

With over 300 companies in our membership, the National Fluid Power Association (NFPA) is a trade association serving manufacturers of fluid power (hydraulic and pneumatic) components and systems, their distributors, suppliers, and related educators.

Our members are motivated to grow the number of students educated in fluid power and connect them to careers in the fluid power industry.

Through the NFPA, a variety of programs and resources exist to connect with fluid power industry members.

There are
